

"Geosynthetics For Africa"

A Conference To Be Held Under The Auspices Of The International Geosynthetics Society (IGS)

In Association With The Geotechnical Division Of
The South African Institution Of Civil Engineering

First Announcement

The Geosynthetics Interest Group Of South Africa Is Proud To Announce
The First African Regional Conference On Geosynthetics

To Be Held Under The Auspices Of
The International Geosynthetics Society (IGS)

Cape Town, South Africa

Wednesday 2nd to Friday 4th September 2009

Come to "The Fairest Cape In All The World" (Sir Francis Drake in 1580), and participate in a unique experience. **GeoAfrica 2009** will present a forum for consulting engineers, manufacturers, installers and academics to exchange information about current and potential applications for geosynthetics in Africa.

This will be the first conference to be held under the auspices of the IGS in the region, and will present an opportunity to meet the top geosynthetics specialists and prospects on the continent. Every visitor to the exhibition floor will be a potential customer, and professionals seeking geosynthetic solutions to their challenges will attend each technical session. This will be the largest gathering of geosynthetics professionals seen in Africa to date.

The conference will include an exhibition for the specification and trade of geosynthetic products and technology to users throughout Africa, as well as those wishing to make an entry into the continent.

Details of the conference are currently being finalised. If you would like to participate in this major event and receive an invitation to submit a technical paper, please send an e-mail with your contact details to Leslie Ferreira at lesley@cebisaconferences.co.za and we will put you on the conference mailing list.
