

GIGSA Editorial Guidelines

Please ensure that articles are written in a professional technical style, and avoid "puffery" (a flattering commendation – especially when used for promotional purposes). GIGSA News will edit out any such content.

There should be no product or company name in the title of the article. However, product, company or system names may be used and their benefits described in the text. (Exceptions may be made in the case of the Benefactor Article appearing on the first page).

Comparisons which purport to illustrate that a given organisation, product or type of product is superior to others on the market will be returned to the submitter for modification.

Articles that present design or test methods that are related to only one product will not be acceptable.

If an article includes images, please send these separately as high-resolution JPG or GIF images, as well as including the images in the document to show preferred placement.

Any images submitted without captions will not be used.

Caption

Please limit submissions to one A4 page in 10 point Ariel font where possible (including high-quality photographs and sketches - material that does not print well, or appear well on computer screens may be rejected).

Longer articles may be considered if they are considered to be particularly interesting, but there is no guarantee that there will be space for such material in any particular publication.

GIGSA News is only issued electronically in Adobe PDF format. Please take this into consideration when composing your submission, as it does affect how it will appear onscreen, and in print.

Articles will be accepted on a first-come first-placed basis, and this invitation to submit material is open only to paid-up GIGSA Members.

Parties wishing to submit an article should contact the editor and a guideline document on required layout will be sent.
