

## The Electrical Scene in South Africa

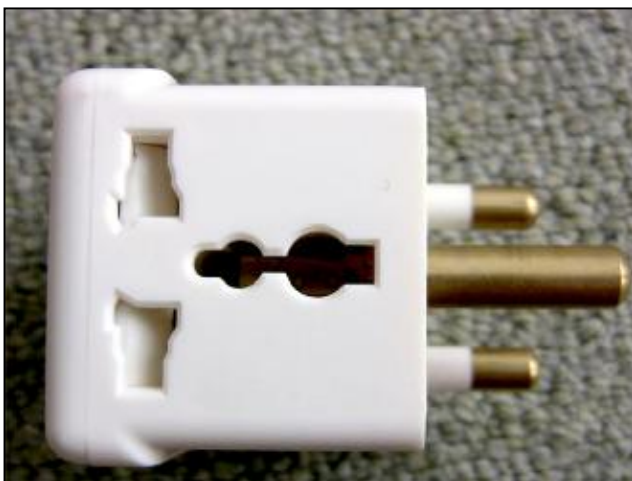

South Africa is on the 220 Volt / 50-60 Hz standard, so if GeoAfrica delegates want to use their own computers / shavers etc they will have to bring along adaptors if they live in countries which use 110 Volt equipment. Many modern laptop chargers can work on a range of 100 – 240 V and 50-60 Hz – check yours before you come!

**South African 220V wall outlet**

**South African 220V Plug**

**South African 220V Multi-Adaptor: Buy them at airport shops.**
