IGS NEWSLETTER – September 2019

Helping the world understand the appropriate value and use of geosynthetics

IGS Announces TC-Stabilization & TC-Hydraulics Workshops in Prague

The International Geosynthetics Society invites IGS members and geotechnical professionals everywhere to participate in its next set of high-level technical workshops. From 10 – 13 November 2019, the IGS Technical Committee on Stabilization (TC-S) and Technical Committee on Hydraulics (TC-H) will hold back-to-back workshops in Prague, Czech Republic. The selected topics will be presented by revered international experts and significant time will be available for discussion and debate...

IGS At 3rd World Irrigation Forum

Methods to mitigate the scandalous loss of water from poor irrigation systems will be discussed when the IGS Vice

President speaks at ICID's conference. In her lecture 'Water Saving Upstream of The Farms', Dr Nathalie Touze will explore the importance of properly lining agricultural canals to prevent the huge amount of leakage endemic to these irrigation structures...

[International Geosynthetics Society](#)

The International Geosynthetics Society (IGS) is a learned society dedicated to the scientific and engineering development of geotextiles, geomembranes, related products, and associated technologies. The core purpose of the IGS is to provide the understanding of and promote the appropriate use of geosynthetic technology throughout the world.

By unsubscribing to this email, you will no longer receive messages from the International Geosynthetics Society, this includes the IGS News, information about events held under the auspices of the IGS, and other official communications regarding your membership including dues and electronic ballots, etc.
