

PROF. ENG. NICOLA MORACI

Full Professor of Geotechnical Engineering and Vice Rector for Research at the Mediterranean University of Reggio Calabria where he was Head of the Department of Civil, Energy, Environmental and Materials Engineering; Member of the Academic Senate and Board of Administrators; Coordinator of the Research Doctorate in Geotechnical Engineering (Tutor of 20 PhD theses) and he is currently the President of the Italian Geotechnical Society (AGI).

His research activity has developed along multiple themes including slope stability, landslide risk mitigation, use of geosynthetics in defence of territory and environmental protection works, landfills and remediation of contaminated sites, soil reinforcement with geosynthetics, protective filters, sustainable geotechnical works. The research activity has led to the editing of more than 220 papers mostly published in important journals and conferences. He received awards for research activities (IGS Award 2008, G&G Best Paper 2017). He is currently Associate Editor of G&G, and Member of the Editorial Board of GI and other important journals.

He has been scientific director of numerous research projects, and invited lecturer at various Conferences, as well as a member of Scientific and Organization Committees of several Conferences. He has been a member of numerous TC for IGS, ISSMGE, CEN and AGI.
